BASF Personal Care and Nutrition GmbH

Job-Titel:
Internship/Thesis Media Design (m/f/d)

Job-Beschreibung

Nourishing lotions, mild shampoos, protective sunscreens, Gentle, environmentally friendly detergents and high-performance household and industrial cleaners - all these products contain ingredients made by our Care Chemicals division. We collaborate with our customers worldwide to develop innovative solutions which appeal to end-users - more and more based on natural and sustainably sourced raw materials.

Responsibilities:
As part of the product development process, the unit Advanced Formulation and Global Performance Technology has access to a wide range of complex test methods for characterizing cosmetic raw materials and formulations. Their task is the visualization of such methods. This helps us to better understand our knowledge and share it both internally and with customers. The team is looking forward to your support from now on for 3 to 6 months.

- With your creativity you will support us in the field of technical communication.
- You will be responsible for the planning, design and production of videos (real, 2D and 3D) for internal and external communication.
- Using the latest software and hardware, you will create explanatory videos, product and image films.

Benefits:

From day one you will be part of the BASF family. You will get involved in challenging fields of activity and have the opportunity to work on exciting projects in an interdisciplinary environment. Depending on the location of the respective group company you will get to know BASF and participate in various workshops and guided tours. In this way you will make numerous interesting experiences and get a deep insight into the world’s leading chemical company.
